

Analyzing and visualizing WeRateDos

By : shuaib Elamrity

Introduction

WeRateDogs is a [Twitter](#) account that rates people's [dogs](#) with a humorous comment about the dog. The account was started in 2015 by college student Matt Nelson, and has received international media attention both for its popularity and for the attention drawn to [social media copyright law](#) when it was suspended by Twitter for breaking these aforementioned laws

In this article, we will mention some information about the evaluation rate of dogs on this site and what dogs receive the most rating and other information that was inferred based on the compilation of more than 4000 tweets for this account and their analysis and conclusion of some valuable information

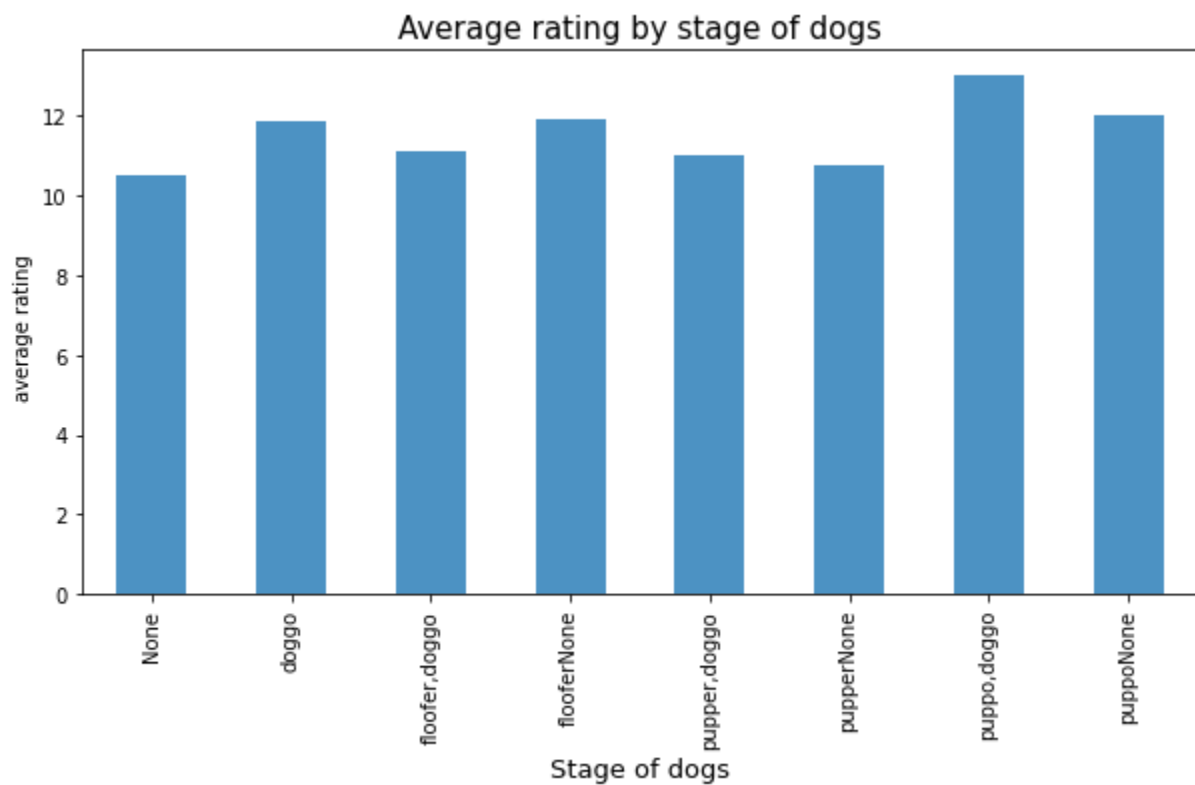

The highest rate of tweets in the year is the last two months (11 and 12)

In general we can see that last 2 month have a highest rate . Then comes the beginning of the year in January and February . Month 8 and 9 have the lowest tweet rate

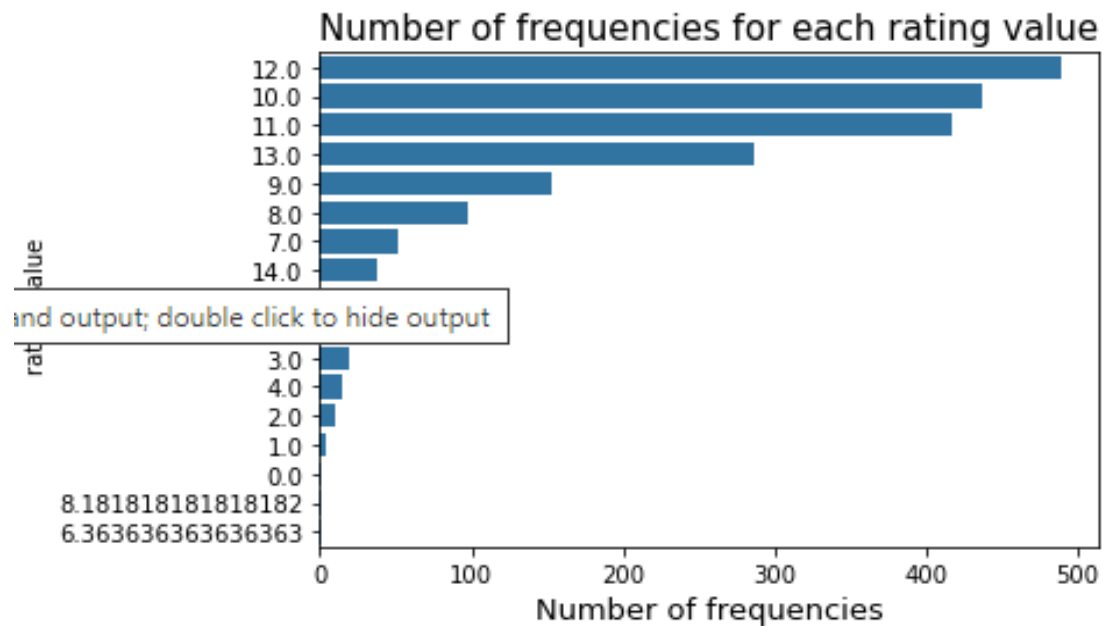

the relationship between the stage of dogs and the rating

General we can see that no stage It has a noticeable or higher rating than the rest of the stages

. puppo is highest rating

the most frequent rating

The highest rating is 12, after that comes 10 .

This shows how much they love dogs

The kind of dog more frequency

The most frequent dog is Golden (*Golden_retriever*) after that coming (*Pembroke*)

image for the second most frequent dog (Pembroke)

A relationship between the rate of tweets and likes

It seems that there is a positive relationship between the two
